Exam Name:	i 6.1 Administration		
Exam Type:	IBM	Exam Code:	000-976
Certification	IBM Specialist	Total Questions:	92

Question: 1

What is the correct communication object type and attribute for creating an Enterprise Extender connection to another system?

- A. A controller type *EE
- B. A controller type *HPR
- C. A virtual device type *EE
- D. A virtual device type *HPR

Answer: A

Question: 2

A customer has a Power 520, serial number 10-12345. It is one of several systems managed by an HMC running Version 7 firmware at TCP/IP address 10.0.0.100. Which of the following describes how to produce a system plan for this system in file MYPLAN.sysplan?

- A. Select system plans from left panel, then select Create System Plan. In the pop-up window, fill in system plan name and description, click OK.
- B. Select 'Service Applications' on the HMC and click the Create System Plan option. In the pop-up window, click the line with 9406-520*1012345, and specify file MYPLAN in the file name prompt.
- C. Launch SPT and click 'Create New Plan.' On the next panel, click the 'Open an Existing System Plan.' In the file prompt, specify <https://10.0.0.100/sysplan>. After the system plan is loaded from the HMC, save to file MYPLAN.
- D. Select 'System Plans' on the HMC, and then click the 'Import...' button. On the pop-up window, click the line with 9406-520*1012345. When the import completes, click the 'Save...' button and specify file MYPLAN in the file name prompt.

Answer: A

Question: 3

An administrator has been directed to create a new DNS server instance named 'ABC' on an IBM I 6.1 partition. Which of the following overviews correctly describe how to do this?

- A. Open a browser to IBM Systems Director Navigator for IBMi on the partition. Navigate to Network > Server > DNS. Select the 'create' action and follow the prompts.
- B. From a command line, run the CRTTCPDNS command to create the ABC instance definition. Use SEU to edit QUSRSYS/QDNSTBL(ABC) to edit the DNS records for the instance.
- C. In System i Navigator, under the system to host the DNS, navigate to Network > Servers > DNS. Right-click on DNS, then select 'New Name Server'. Follow the prompts.
- D. From a command line, use STRQSH to start the PASE command prompt Run the script: crdns -n ABC. Use the Edit File (EDTF) command on IFS file /QIBM/UserData/OS400/DNS/ABC.TBL to enter the new DNS records.

Answer: C

Question: 4

Which of the following recovery limit settings allows a communications line to make infinite recovery attempts?

- A. Recovery limit attempts (0), Time interval in minutes (1)
- B. Recovery limit attempts (1), Time interval in minutes (0)
- C. Recovery limit attempts (*NOMAX), Time interval in minutes (0)
- D. Recovery limit attempts (0), Time interval in minutes (*NOMAX)
