Citrix

MetaFrame Secure Access Manager Administration

Visit: <http://www.pass4sureofficial.com/exams.asp?examcode=1Y0-721>

Pass4sureofficial.com is a reputable IT certification examination guide, study guides and audio exam provider, we not only ensure that you pass your 1Y0-721 exam in first attempt, but also you can get a high score to acquire Citrix certification.

If you use pass4sureofficial 1Y0-721 Certification questions and answers, you will experience actual 1Y0-721 exam questions/answers. We know exactly what is needed and have all the exam preparation material required to pass the exam. Our Citrix exam prep covers over 95% of the questions and answers that may be appeared in your 1Y0-721 exam. Every point from pass4sure 1Y0-721 PDF, 1Y0-721 review will help you take Citrix 1Y0-721 exam much easier and become Citrix certified. All the Questions/Answers are taken from real exams.

Here's what you can expect from the Pass4sureOfficial Citrix 1Y0-721 course:

- * Up-to-Date Citrix 1Y0-721 questions taken from the real exam.
- * 100% correct Citrix 1Y0-721 answers you simply can't find in other 1Y0-721 courses.
- * All of our tests are easy to download. Your file will be saved as a 1Y0-721 PDF.
- * Citrix 1Y0-721 brain dump free content featuring the real 1Y0-721 test questions.

Citrix 1Y0-721 certification exam is of core importance both in your Professional life and Citrix certification path. With Citrix certification you can get a good job easily in the market and get on your path for success. Professionals who passed Citrix 1Y0-721 exam training are an absolute favorite in the industry. You will pass Citrix 1Y0-721 certification test and career opportunities will be open for you.

Question 1

How does creating a portal with the Basic option differ from creating a portal with the Custom option?

- A. Basic portals cannot be customized after they are created.
- B. During basic portal creation no options are presented.
- C. Basic portals are given a generic name that cannot be changed.
- D. During basic portal creation only the authentication type and menu style are specified.

Answer: B

Secure Access Manager Administrator's Guide v2.1, Page 61

Question 2

When a user makes a request within portal, which component prompts the NFuse Elite Load Balancer to identify an Agent server?

- A. Cds.dll
- B. Loadbalanceserver.dll
- C. Host.dll
- D. Host.xps

Answer: C

Question 3

In a given configuration of the Embedded Application CDA at access center level, the height is specified. What determines the width of the CDA?

- A. The width is specified in pixels at the page level.
- B. The width also is specified during the access center level configurations.
- C. The width is dependent on the number of columns specified for the page.
- D. The default value for the width is set once the CDA is added and cannot be changed.

Answer: C

Secure Access Manager Administrator's Guide v2.1., Page 76

Question 4

How can the user change the maximum number of results from the default (Administrator set) value in the Search CDA?

- A. This setting is set by the administrator and cannot be configured by the user.
- B. The number of results displayed depends on whether the CDA is maximized or not.
- C. By personalizing the CDA and specifying the desired value for "Display results in groups no larger than:".
- D. In the advanced search screen of the Search CDA, enter the desired number in Maximum Results to display per page.

Answer: C

Visual Inspection

Question 5

What is the minimum requirement for enabling Content Redirection with MetaFrame Secure Access Manager?

- A. MetaFrame XP Server 1.0
- B. The Web Interface for MetaFrame XP

- C. MetaFrame XP Server with Feature Release 2
- D. MetaFrame XP Server with Feature Release 3

Answer: C

Secure Access Manager Administrator's Guide v2.1., Page 127

Question 6

Which of the following are true for folders created with the Access Management Console?
(Choose two)

- A. Folders are containers for users.
- B. Folders are containers for CDAs.
- C. Folders are containers for pages.
- D. Folders are assigned roles when created.
- E. Folders are displayed in the access center menu.

Answer: C, E

Secure Access Manager Administrator's Guide v2.0., Page 73

Question 7

Which two of the following are displayed when a standalone Access Management Console is first launched? (Choose two)

- A. All active roles in the access server farm.
- B. All active users in the access server farm.
- C. All the access centers in the access server farm.
- D. The MetaFrame Secure Access Manager license key.
- E. The access server farm that was managed last from the console.

Answer: C, D

Secure Access Manager Administrator's Guide v2.1., Page 107

Not E: The questions states what is displayed when the console is FIRST launched. Answer e cannot be correct, since it shows the server farm which was managed LAST from the console.

Question 8

Which three of the following CDAs require administrators to enter Database information using the Advanced Configuration Wizard? (Choose three)

- A. Web Search CDA
- B. Interactive Poll CDA
- C. Message Center CDA
- D. Alert Broadcaster CDA
- E. Program Neighborhood CDA

Answer: B, C, D

Visual Inspection

Question 9

What must be done before resources can be delivered to users in an access center where authentication is required? (Choose four)

- A. Import Users
- B. Import a theme
- C. Assign users to role(s)
- D. Create an access center

- E. Create a role for each user
- F. Install MetaFrame Secure Access Manager

Answer: C, D, E, F

Question 10

Which of the following statements is true for a standalone Access Management Console?

- A. A standalone console cannot import and export access centers.
- B. A standalone console can configure multiple farms concurrently.
- C. A standalone console can be installed on Microsoft NT 4.0 server.
- D. A standalone console can be published as a MetaFrame XP server application.

Answer: D

Secure Access Manager Administrator's Guide v2.1., Page 106

Question 11

Scenario: There is a new team SQL administrator. This person will administer all databases including those required for CDA's within the access center. Because he is replacing another employee, the new administrator's credentials will need to be updated for the SQL database server. How can these new credentials be added to the access center?

- A. Edit the SQL database registry key.
- B. Create a new SQL account using SQL Server Agent.
- C. Create a new role and give the new user access to this role.
- D. Use the Service Configuration Wizard to specify the new credentials.
- E. Use the People node in the Access Management Console to specify the new credentials.

Answer: D

Visual Inspection

Question 12

There are two administrators assigned to the access server farm of Examsheets. To manage access centers, each administrator has an Access Management Console installed on her local workstation. One day, Admin1 attempts to connect to the access server farm while Admin2 is connected to the server farm. Admin1 chooses the Take Control command button when prompted in the Access Management Console. What will happen if Admin2 makes configuration changes in the local console when Take Control has been used by Admin1?

- A. The changes will be lost.
- B. The changes will take effect immediately.
- C. The Take Control command will be overridden.
- D. The changes will take effect after Admin1 logs off.
- E. The console will explode.

Answer: B

Secure Access Manager Administrator's Guide v2.1., Page 106

Question 13

HOST.DLL sends a message to Agent server to process a request from a browser. What happens before the message is sent to Agent server?

- A. The Agent server generates an HTML response.
- B. HOST.DLL unwraps the HTML from the message.
- C. The Agent server pulls the configuration data from the State server.
