Oracle

Oracle9i Build Internet Applications I

OfficialCerts.com is a reputable IT certification examination guide, study guides and audio exam provider. We ensure that you pass your 1Z0-131 exam in first attempt and also get high scores to acquire Oracle certification.

If you use OfficialCerts 1Z0-131 Certification questions and answers, you will experience actual 1Z0-131 exam questions/answers. We know exactly what is needed and have all the exam preparation material required to pass the exam. Our Oracle exam prep covers over 95% of the questions and answers that may be appeared in your 1Z0-131 exam. Every point from pass4sure 1Z0-131 PDF, 1Z0-131 review will help you take Oracle 1Z0-131 exam much easier and become Oracle certified.

Here's what you can expect from the OfficialCerts Oracle 1Z0-131 course:

- * Up-to-Date Oracle 1Z0-131 questions as experienced in the real exam.*
- * 100% correct Oracle 1Z0-131 answers you simply can't find in other 1Z0-131 courses.*
- * All of our tests are easy to download. Your file will be saved as a 1Z0-131 PDF.*
- * Oracle 1Z0-131 brain dump free content featuring the real 1Z0-131 test questions.*

Oracle 1Z0-131 certification exam is of core importance both in your Professional life and Oracle certification path. With Oracle certification you can get a good job easily in the market and get on your path for success. Professionals who passed Oracle 1Z0-131 exam training are an absolute favorite in the industry. You will pass Oracle 1Z0-131 certification test and career opportunities will be open for you.

Question: 1.

You create a form module for the Order Entry application. It contains the CV_ITEM canvas with a Date_Ordered text item. You alter the Date_Ordered text item so that the Canvas property is unspecified, but left the Visible property as the default.

Where will the Date_Ordered item appear?

- A. It will appear on the CV_ITEM canvas because the Visible property will override the Canvas property at runtime.
- B. It will appear in the window at runtime, but outside the CV_ITEM canvas.
- C. It will not appear in the Layout Editor or at runtime.
- D. It will appear in the Layout Editor, but it will not appear at runtime.

Answer: C

Question: 2.

Which statement about system messages is true?

- A. The message level and severity are unrelated.
- B. More critical system messages have higher severity levels.
- C. You can suppress messages as long as the level is greater than 25.
- D. A message level of 0(zero) suppresses all except the most critical messages.

Answer: B

Question: 3.

You want to exercise more control over your queries at run time. Which statement is true about actions you can do during query processing?

- A. You cannot change the constructed SELECT statement.
- B. You can override any part of the constructed SELECT statement by resetting the SYSTEM.LAST_QUERY variable and resume the process by calling the SELECT_RECORDS built-in procedure in the Pre-Query trigger.
- C. You can determine which item should be included in a query by setting its QUERYABLE property to Yes in the Pre-Query trigger.
- D. You can dynamically change query conditions in the Example Record for each record to be fetched next by examining the current record in the Post-Query trigger.

Answer: A

Question: 4.

Under which two conditions will a trigger fail? (Choose two)

- A. When an unhandled exception occurs
- B. When you raise the WHEN OTHERS exception.
- C. When a trigger is defined at the wrong scope.
- D. When you raise the FORM_TRIGGER_FAILURE exception.
- E. When the PL/SQL editor displays a compilation error.

Answer: A & D

Question: 5.

Which built-in invokes the LOV that is attached to the current text item in the form?

- A. SHOW_LOV

- B. LIST_VALUES
- C. REFRESH_LOV
- D. POPULATE_LOV

Answer: B

Question: 6.

The Navigation Style property is set to Change Record for a data block. What happens to the cursor when you reach the end of the current record in the block?

- A. The cursor moves to the first record of the previous adjacent data block.
- B. The cursor moves to the previous record of the same data block.
- C. The cursor moves to the next record at the same data block.
- D. The cursor moves to the first record of the next adjacent data block.

Answer: C

Question: 7.

You create a multi-record block. The user requests that the record with input focus be displayed with a red background and white foreground. You create a visual attribute, red_white, for this purpose. What block property do you set to accomplish this task?

- A. Records Displayed
- B. Reference Information
- C. Update Changed Columns
- D. Current Record Attribute.

Answer: D

Question: 8.

You need to change the text of popup menu that appears when a user right clicks the mouse in the EMP_DATA block. Where could you find the node for the popup menu in the object navigator?

- A. Built-in packages
- B. Menus
- C. PL/SQL libraries
- D. Object libraries
- E. Form

Answer: E

Explanation:

The popup menu node is found in the Form in the Object Navigator.

Question: 9.

What is the first step you would take to attach a custom menu module to a form module?.

- A. Generate the menu module.
- B. Regenerate the form module that the menu will be attached to-
- C. Designate the location of the form module.

Answer: A

Question: 10.

You are modifying the order entry application and want to disable all function keys that have not been explicitly defined. Which trigger can you define to accomplish this?

- A. KEY-OTHERS
- B. KEY-LISTVAL
- C. BACKKEY-FN
- D. KEY-UP

Answer: A

Explanation:

A Key-Others trigger fires when an operator presses the associated key. A Key-Others trigger is associated with all keys that can have key triggers associated with them but are not currently defined by function key triggers (at any level). A Key-Others trigger overrides the default behavior of a Run form function key (unless one of the restrictions apply). When this occurs, however, Form Builder still displays the function key's default entry in the Keys screen.

Question: 11.

You are new to the development staff and need to determine the file system location for a file in a project you are working on. Where can you obtain this information from within project builder?

- A. Property palette.
- B. Global registry.
- C. User registry.
- D. Project view.

Answer: B

Explanation:

Project builder save the information about the current projects in the Global Registry.

Question: 12.

You are creating a general ledger application and want the detail for posted general applications to be stored in a temporary table before they are committed to the general_entry table. Which built-in can you use in a pre-commit trigger to create this temporary table?

- A. FORMS_OLE
- B. FORMS_DDL
- C. USER:EXIT
- D. HOST.

Answer: B

Explanation:

FORMS_DDL Issues dynamic SQL statements at runtime, including server side PL/SQL and DDL. All DDL operations issue an implicit COMMIT and will end the current transaction without allowing Form Builder to process any pending changes, as well as losing any locks Form Builder may have acquired.

Question: 13.

You have created a customized menu. You want users to be able to run a SQL report form menu item without having to provide their username and password. Which two predefined substitution parameters can you use? (Choose two)

- A. TT

OfficialCerts.com Certification Exam Full Version Features;

- Verified answers researched by industry experts.
- Exams **updated** on regular basis.
- Questions, Answers are downloadable in **PDF** format.
- **No authorization** code required to open exam.
- **Portable** anywhere.
- 100% success **Guarantee**.
- **Fast**, helpful support 24x7.
