Nortel WLAN 2300 RIs. 7.0 Planning & Engineering

OfficialCerts.com is a reputable IT certification examination guide, study guides and audio exam provider. We ensure that you pass your 920-270 exam in first attempt and also get high scores to acquire Nortel certification.

If you use OfficialCerts 920-270 Certification questions and answers, you will experience actual 920-270 exam questions/answers. We know exactly what is needed and have all the exam preparation material required to pass the exam. Our Nortel exam prep covers over 95% of the questions and answers that may be appeared in your 920-270 exam. Every point from pass4sure 920-270 PDF, 920-270 review will help you take Nortel 920-270 exam much easier and become Nortel certified.

Here's what you can expect from the OfficialCerts Nortel 920-270 course:

- * Up-to-Date Nortel 920-270 questions as experienced in the real exam.*
- * 100% correct Nortel 920-270 answers you simply can't find in other 920-270 courses.*
- * All of our tests are easy to download. Your file will be saved as a 920-270 PDF.*
- * Nortel 920-270 brain dump free content featuring the real 920-270 test questions.*

Nortel 920-270 certification exam is of core importance both in your Professional life and Nortel certification path. With Nortel certification you can get a good job easily in the market and get on your path for success. Professionals who passed Nortel 920-270 exam training are an absolute favorite in the industry. You will pass Nortel 920-270 certification test and career opportunities will be open for you.

Exam Name:	Nortel WLAN 2300 Rls. 7.0 Planning and Engineering		
Exam Type:	Nortel		
Exam Code:	920-270	Total Question	31

Question: 1

A Voice over WLAN customer is determining the type of WLAN handsets to provide to their users. The customer's environment is industrial and noisy, so maximum durability and loud-environment ringer and speaker is required. Many users will also need push-to-talk (PTT) capability. Which WLAN handset should the customer select to provide the desired functionality to the users?

- A. 2210
- B. 2212
- C. 6120
- D. 6140

Answer: D

Question: 2

A customer wants to provide network connectivity to a new building on its campus, but does not want to run cables between buildings. You determine that this can be accomplished using mesh services on the WLAN 2300 series network. Which Access Point model can support this configuration?

- A. 2330
- B. 2330-A
- C. 2332
- D. 2350

Answer: C

Question: 3

A large business operation has an existing wired network with subnets in the business office and showroom. They wish to extend wireless access to the warehouse. The customer does not have wireless access anywhere else in its network. There are a number of mobile users who move to and from the business office, showroom, and warehouse with customers. Which WLAN mode of operation is best suited to these mobile users?

- A. Ad Hoc Wireless LAN
- B. Infrastructure Wireless LAN
- C. Ad Hoc Wireless LAN for roaming
- D. Infrastructure Wireless LAN for roaming

Answer: B

Question: 4

A site survey for a Wireless LAN site has been completed. Given the configuration and building materials within the facility, it is expected that a high number of access points (AP) in close proximity will be required to ensure adequate coverage. The design team is concerned with channel overlap due to the number of AP required and has determined that 802.11a will be used. Which rationale supports this choice?

- A. 802.11a has more non-overlapping channels than 802.11b.
- B. 802.11a uses non-overlapping channels while 802.11b does not.
- C. 802.11a covers more distance than 802.11b and requires fewer APs.
- D. 802.11a is better able to penetrate dense building materials than 802.11b.

Answer: A

Exam Name:	Nortel WLAN 2300 Rls. 7.0 Planning and Engineering		
Exam Type:	Nortel		
Exam Code:	920-270	Total Question	31

Question: 5

A customer is deploying wireless 6120/6140 handsets throughout their Wireless LAN. They are using a DHCP server to configure the 6120/6140 systems. By using a DHCP they are currently assigning an IP address, and DHCP options 1, 3, 60, and 66. In this scenario, which DHCP option is also required?

- A. 6
- B. 15
- C. 43
- D. 151

Answer: D

Question: 6

A new WLAN customer wants secure their wireless network. Which method would you least recommend because of its weaknesses?

- A. WPA
- B. PEAP
- C. TKIP
- D. 128-bit WEP

Answer: D

Question: 7

A customer with a new WLAN 2300 series has some basic WLAN Security needs. They want to provide WLAN to visitors for Internet access without security. Which basic type of security will accomplish this?

- A. MAC filters
- B. bandwidth limitation
- C. limited access area
- D. DMZ connection only

Answer: D

Question: 8

A customer wants to install a WLAN. They are concerned about security and want to know about device-independent authentication. Which two methods would be considered a device-independent type of authentication? (Choose two.)

- A. smart card
- B. MAC filtering
- C. active directory
- D. biometric device

Answer: A, D

Question: 9

You want to implement RADIUS in a WLAN network. Which network component cannot be used as a Network Access Server (NAS) in the WLAN?

- A. Access Point
- B. Security Server
- C. Client PC
