IBM

Websphere Portal V5.0, Deployment And Administration

Visit: http://www.pass4sureofficial.com/exams.asp?examcode=000-347

Pass4sureofficial.com is a reputable IT certification examination guide, study guides and audio exam provider, we not only ensure that you pass your 000-347 exam in first attempt, but also you can get a high score to acquire IBM certification.

If you use pass4sureofficial 000-347 Certification questions and answers, you will experience actual 000-347 exam questions/answers. We know exactly what is needed and have all the exam preparation material required to pass the exam. Our IBM exam prep covers over 95% of the questions and answers that may be appeared in your 000-347 exam. Every point from pass4sure 000-347 PDF, 000-347 review will help you take IBM 000-347 exam much easier and become IBM certified. All the Questions/Answers are taken from real exams.

Here's what you can expect from the Pass4sureOfficial IBM 000-347 course:

* Up-to-Date IBM 000-347 questions taken from the real exam.
* 100% correct IBM 000-347 answers you simply can't find in other 000-347 courses.
* All of our tests are easy to download. Your file will be saved as a 000-347 PDF.
* IBM 000-347 brain dump free content featuring the real 000-347 test questions.

IBM 000-347 certification exam is of core importance both in your Professional life and IBM certification path. With IBM certification you can get a good job easily in the market and get on your path for success. Professionals who passed IBM 000-347 exam training are an absolute favorite in the industry. You will pass IBM 000-347 certification test and career opportunities will be open for you.

Question: 1
In order to configure Search in clustered portal environment, which of the following is the best solution?

A. Create an index on each node.
B. Store the documents on a mounted file system.
C. Create the index on the deployment manager node.
D. Replicate the index to each cluster member.

Answer: B

Question: 2
What authentication options can be selected by the administrator when creating a new web clipping portlet?

A. Form-based Authentication
B. TAI (Trust Association Interceptor)
C. Client Certificate Authentication
D. HTTP Basic Authentication

Answer: A, D

Question: 3
In order to make a portlet the source portlet in a cooperative portlet scenario, what must be added to the portlet?

A. custom JSP tag library
B. WSDL with custom extensions
C. portlet parameter name
D. security.xml

Answer: A

Question: 4
Which of the following statements is TRUE regarding the PortletSettings configuration object?

A. Contains configuration parameters for all instances of a concrete portlet
B. Initialized by the developer and cannot be modified by the administrator
C. Allows each user to customize their own settings
D. Available to every portlet in the portlet application

Answer: A

Question: 5
The administrator has installed a portlet from development and placed it on a page called "Human Resources". Employee Dave cannot see the portlet on this page with the other portlets when he logs in, but the other employees in his department can. From the options below, what could be the problem?

A. The portlet application WAR did not contain the appropriate page information in the portlet.xml file
B. The portlet was not activated after it was installed
C. The appropriate access rights for this portlet were never given to Dave
D. Dave does not have rights to view the Human Resources page

Answer: C

Question: 6
Which of the following statements are TRUE regarding portlet applications?

A. Each portlet application can contain multiple portlets
B. The application is inside of a Web Application Archive (WAR) file
C. Portlet applications are not required since portlets can be deployed by themselves
D. Only one portlet application can be contained in a Web Application Archive (WAR) file

Answer: A, B

Question: 7
An administrator needs to have a configuration parameter available for all of the portlets in the portlet application and requires the ability to change them if needed. Currently, he must add the name/value pairs each time the portlet is installed. Where can he instruct the developer to place the parameters in the portlet application to help reduce the time it takes to configure the portlet?

A. Use the <init-param> in the web.xml
B. The parameters would have to be programmatically added in the portlet source
C. Use the <context-param> in the portlet.xml
D. Portlet application parameters can not be defined before the application is installed

Answer: C

Question: 8
Which of the following statements is true if a portlet is updated by uninstalling and reinstalling the portlet application?

A. Since the portlet data is stored in the database based on the portlet name, uninstalling and reinstalling the portlet will maintain the portlet data and user specific configuration
B. All portlet data including user configuration, saved portlet and portlet application parameters and portlet page placement are deleted and must be reconfigured
C. User specific configuration data for this portlet will be maintained since it's stored in the WMM database, however, placement of the portlet on pages will have to be reconfigured
D. Since page layout is maintained through the Manage Pages portlet, the portlet will remain on the page until removed, however, the portlet configuration data will be lost

Answer: B

Question: 9
When cloning a portlet using the administrative pages, which of the following is true regarding the data associated with the portlet and portlet application?

A. The portlet application parameters are copied from the cloned application, but the portlet parameters are left blank since this is a new version of the portlet
B. The new portlet application parameters and portlet parameters are created from the original portlet.xml as base configuration data for the clone
C. The portlet application and portlet are cloned, but the parameters are left blank for configuration by the administrator
D. The portlet application data and the portlet data are duplicated to the clone from the portlet being copied

Answer: D

Question: 10
Considering best production environment practices, which of the following should reside in the de-militarized zone (DMZ)?

A. WebSphere Application Server and the master repository
B. HTTP Server and WebSphere Application Server plugin file
C. WebSphere Portal and xmlaccess.bat
D. LDAP directory server

Answer: B

Question: 11
When running multiple cluster members in a vertical clustering configuration, what can be done to ensure that there are no port conflicts between cluster members?

A. Assign Custom Unique Names to the portlets in each cluster member.
B. Check the Generate Unique HTTP Ports option in the WebSphere Application Server Admin Console.
C. Edit the port numbers of each member in the web server plug-in.
D. Check the create replication entry in this server option in the WebSphere Application Server Admin Console.

Answer: B

Question: 12
In a production environment, where is the BEST location for the LDAP directory?

A. The LDAP directory co-resident with WebSphere Portal.
B. The LDAP directory co-resident with WebSphere Application Server (WAS)
C. The LDAP directory located on a separate machine from WebSphere Portal.
D. The LDAP directory co-resident with the HTTP Server.

Answer: C

Question: 13
Which of the following database scenarios is NOT valid in a horizontal clustering configuration for WebSphere Portal?

A. One centralized Oracle database for the entire cell.
B. DB2 database clients on each node.
C. One centralized Cloudscape database for the entire cell.
D. One centralized DB2 database for the entire cell.

Answer: C

Question: 14
A customer has decided to use WebSphere Portal V5. The customer already has an IBM Directory Server 5.1 based LDAP-Server. The customer wants to enable the already deployed users as WebSphere Portal users. Which of the following statements are TRUE regarding the required integration?

A. There must be a user named wpsadmin with the password wpsadmin prior to installation.
B. After portal installation, passwords for wpsadmin and wpsbind should not be changed.
C. A group named wpsadmins must exist in the directory.
